I am a visualization and human-computer interaction (HCI) researcher, specializing in creative expression with data for communication and presentation, the visualization of time-oriented data, and interacting with data beyond the desktop.

EXPERTISE

VISUALIZATION, INTERFACE, AND INTERACTION DESIGN

Designing and developing dynamic, interactive, and multimodal techniques and tools for presenting and analyzing data.

QUALITATIVE HUMAN FACTORS RESEARCH

Pre-design empiricism via observational studies, retrospective interviews, and design probes; summative think-aloud usability evaluations; data analysis via thematic coding and affinity diagramming.

QUANTITATIVE HUMAN FACTORS RESEARCH

Experimental design for laboratory- and web-based experiments to evaluate graphical perception and interaction design; descriptive and inferential statistics: analysis of variance, estimations of effect size.
