I am a researcher working at the intersection of information visualization and human-computer interaction. My research interests include: creative expression with data for communication and presentation, visualization and interaction design for devices large and small, and the visualization of time-oriented data.

EXPERTISE

VISUALIZATION AND INTERFACE DESIGN

Designing and developing visualization techniques and tools for presenting and analyzing data.

QUALITATIVE HUMAN FACTORS RESEARCH

Data collection via retrospective interviews, observational studies, think-aloud usability studies, and design probes; data analysis via thematic coding and affinity diagramming.

QUANTITATIVE HUMAN FACTORS RESEARCH

Experimental design for laboratory- and web-based experiments to evaluate visual perception and interaction design; descriptive and inferential statistics: analysis of variance, estimations of effect size.
